SIX YEARS OF EXCELLENCE

Over the last 6 years, the Excellence in Concrete Construction Awards have developed into the Institute's premier international project awards program. Project submissions have grown substantially, the judging panel has expanded, and local opportunities are gaining momentum each year.

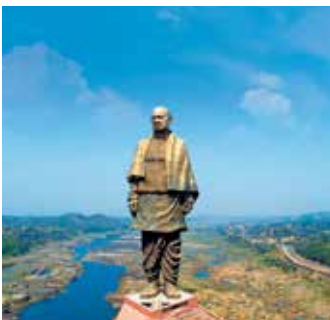

The competitiveness of the program has expanded beyond the capacity of our previous panel, which was comprised of four to five judges, to a panel of 25 expert professionals. This year's panel consisted of 25 experts that served as category judges and three experts that served as our overall winner judges. Our 2020 panel of esteemed industry professionals evaluated projects and selected winners based on architectural and engineering merit, creativity, innovative construction techniques or solutions, innovative use of materials, ingenuity, sustainability and resilience, and functionality.

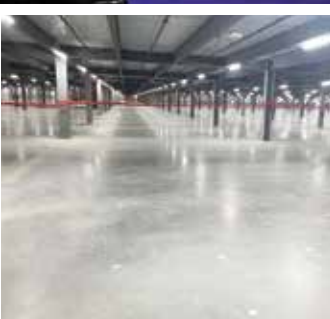

These projects were submitted in the following categories:

- Low-Rise Buildings
- Mid-Rise Buildings
- High-Rise Buildings
- Decorative
- Infrastructure
- Repair and Restoration

In addition to the increase in judges, the program has also gained popularity with the development of local awards programs that have adopted ACI's name and branding.

2020 OVERALL JUDGES

Glenn Bell

Glenn Bell recently retired from Simpson Gumpertz & Heger (SGH) after a 45-year career as a structural engineer involving creative design of new structures, investigation of structural distress and failure, and structural rehabilitation. Bell's design projects include Spaceship Earth, the geodesic sphere at Walt Disney World Epcot Center; the Aga Khan Hospital and Medical University, a large complex of reinforced concrete structures in Karachi, Pakistan; and the Bahai Temple of South America outside Santiago, Chile. Bell investigated the collapse of the suspended walkways at the Hyatt Regency Kansas City and served as a technical advisor for SGH's progressive collapse analysis for NIST for World Trade Center Towers 1 and 2 during 9/11. Bell has extensive experience with structural rehabilitation, including concrete repairs for building structures and their façades, bridges, and parking structures.

Since retiring from SGH in January 2020, Bell works as an independent consultant. He is 2020 President of the Structural Engineering Institute of ASCE (SEI), a Director of Confidential Reporting on Structural Safety – US, Galletly Dickson Visiting Scholar at the Department of Architecture and Civil Engineering at the University of Bath, and serves on the board of The Charles Pankow Foundation. Bell received the 2018 Presidents Award and the 2019 Dennis Tewksbury Award both from SEI. He was named one of ENR's 2019 Top Newsmakers and was Richard J. Carroll Memorial Lecturer in the department of Civil and Systems Engineering at the Johns Hopkins University.

Rob Reinders

Rob Reinders is a Licensed Architect and the Vice President of Design and Project Management at Marriott International's Global Design Strategies team. Reinders joined Marriott International in 1987 as a Project Designer, moving through several roles at Marriott headquarters in Washington, DC, until beginning his role in Europe in 2011. His customer-focused attitude and dedication to Marriott's unique service culture help him create loyal business relationships. He is known for his ability to find creative design solutions to difficult site and building challenges. He aggressively promotes growth and brand equity—always seeking a mutually beneficial and sensible balance between owner interests and brand standards. In his career with Marriott, he has overseen the successful completion of thousands of hotel projects.

Prior to Marriott, Reinders worked for more than 10 years with architectural firms specializing in full-service hotel design. He has taught a graduate-level course at Cornell University and recently received a Design Achievement Award from Iowa State University College of Design. Reinders received his BA in architecture from Iowa State University and his master's of architecture from Rice University.

Maria Kaszynska

Maria Kaszynska is a Professor and Dean of Faculty of Civil Engineering and Architecture, West Pomeranian University of Technology in Szczecin, Poland. She is a member of the Committee on Civil Engineering (KILiW) of the Polish Academy of Sciences (PAN), and a member of the KILiW Section of Concrete Structures. Kaszynska chairs for the Building Materials Section of the Civil Engineering Committee of the Polish Academy of Sciences and serves as ACI Liaison with that committee. She also chairs for the Scientific Committee of the Polish Society of Civil Engineers (PZITB).

Kaszynska is a member of both the ACI Advisory International Committee and of the Scientific Committee of Building Research Institute in Warsaw (ITB). Her area of expertise includes concrete technology, material properties, high-performance concrete, self-consolidating concrete, early-age properties of concrete, hydration heat, and effect of admixtures and additives on properties of concrete. Kaszynska has organized biannual conferences on structural failures since 1994. These conferences have become major events with attendance of over 500 participants representing design and construction companies as well as research institutions and government agencies. She is Head of the Jury for Award of Competition "Builder 4 Young Engineers" and member of the Jury for Competition "Förderpreis Beton Central Europe".

George W. Seegebrecht – Master of Ceremonies

George W. Seegebrecht has worked in the construction industry for over 33 years. The majority of his career has involved conducting troubleshooting of concrete and shotcrete problems. Seegebrecht is an active member and Fellow of ACI. He is Chair of Joint ACI-CRSI Committee C680, Adhesive Anchor Installer, and is a member of ACI Committees C610, Field Technician Certification; C630, Construction Inspector Certification; 506, Shotcreting; and 522, Pervious Concrete. He is also a member of the American Shotcrete Association (ASA), the International Concrete Repair Institute (ICRI), and ASTM International. Seegebrecht is a licensed professional engineer in 13 states. He is a regular speaker for educational seminars for the Portland Cement Association (PCA) and the University of Wisconsin – Madison. He has presented educational sessions at organizations such as CRSI, CSDA, ICRI, and World of Concrete, as well as in-house programs for various clients. He is currently the Examiner of Record for the Illinois Chapter – ACI certification program.
