# NINE YEARS OF EXCELLENCE

Over the last 9 years, the Excellence in Concrete Construction Awards has grown into the Institute's premier awards program. Project submissions have increased, the judging panel has expanded, and local opportunities are gaining momentum.

This year competitiveness of the program required a judging panel of 31 expert professionals (28 category judges and three overall judges). Our panel judged projects based on architectural and engineering merit, creativity, innovative construction techniques or solutions, innovative use of materials, ingenuity, sustainability and resilience, and functionality. Projects were submitted in the following categories:

- Low-Rise Structures
- Mid-Rise Structures
- High-Rise Structures
- Decorative
- Infrastructure
- Flatwork
- Repair and Restoration

The Excellence Awards has spurred the development of new local programs adopting the Excellence Awards name and branding.

## *First Course*

### Dinner Salad

Field Green Salad: Petite greens, segmented citrus, radish, candied pecans, brie spread, balsamic vinaigrette

## *Entrée*

Pan-seared breast of chicken: seasonal vegetable and potato hash, sage-brown butter vinaigrette

## *Dessert*

Lemon Meringue Tart: Shortbread cookie dough, lemon curd, Italian meringue

**Ronald G. Burg** (Ron) has served as the Executive Vice President, chief staff officer, of the American Concrete Institute from 2010-2023. Prior to joining ACI, Burg held several research and consulting positions in the concrete industry. Burg began his extensive concrete and construction industry career in 1977 and held various positions with materials testing firms, consultants, and research institutions. Burg specialized in research and consulting on high-strength concrete, high-performance concrete, lightweight concrete, elastic and non-elastic behavior of concrete, concrete durability, and designing and analyzing specialty concretes.

An ACI member since 1984, Burg is a Fellow of ACI. Previously, he served on ACI's Board of Direction, and is a past member and Chair of ACI's Technical Activities Committee. Burg is a member and past Chair of ACI Committee 363, High-Strength Concrete, and has served on several other ACI committees, including 130, Sustainability of Concrete; 209, Creep and Shrinkage in

Concrete; 213, Lightweight Aggregate and Concrete; and 311, Inspection of Concrete. Additionally, Burg served on the Certification Programs Committee, Educational Activities Committee New Programs Task Force, Financial Advisory Committee, and Responsibility in Concrete Construction Committee.

Burg has authored numerous papers and publications dealing with the response of cementitious materials to elevated temperatures and harsh environmental conditions; the design, analysis, and production of high-strength concrete and lightweight concrete; and thermal performance of various building materials. In 2001, Burg and his co-authors received the ACI Wason Medal for Materials Research for their Concrete International article on "Compression Testing of HSC: Latest Technology."

A licensed professional engineer in a number of states, Burg received his BS in civil engineering from Iowa State University in 1977. He is, or has held membership with several other industry associations, including the Construction Institute of the American Society of Civil Engineers, Precast/Prestressed Concrete Institute, and ASTM International.

**Roberto Stark**, FACI, is the President of Stark + Ortiz, S.C., a consulting firm based in Mexico City, which provides structural design services for urban and infrastructure projects throughout Mexico, Peru, Panama, Spain, Colombia, and Guatemala.

# We're Building the Future

Mission: We make strategic investments in ideas, research, and people to create the future of the concrete industry

Through its councils and programs, the ACI Foundation helps to keep the concrete industry at the forefront of advances in material composition, design, and construction. Our focus:

Our Concrete Innovation Council identifies technologies and innovation that are aligned with ACI and industry strategies and helps facilitate their use when appropriate

Our Concrete Research Council advances the knowledge and sustainable aspects of concrete materials, construction, and structures by soliciting, selecting, financing, and publishing research

Our Scholarship Council supports our future concrete innovators and leaders by administering fellowships and scholarships to help bridge the financial gap for students

Our Veterans Rebate for ACI Certification program helps honorably discharged veterans and increases skills in the industry's workforce. [ACICertification.org/veteranrebate](https://ACICertification.org/veteranrebate)
