- Cost Estimating
- Construction Documents & Permitting
- Construction

PROJECT DESCRIPTION

- The existing skatepark at Torguson park was no longer meeting the needs of the community.
- Grindline collaborated with the community to design a nearly 13,000 sq. ft. concrete skatepark outfitted with exciting elements for all skill levels.
- The park consists of a one-of-a-kind flow bowl, a pool style bowl, and a large street skate area to create 3 separate skating experiences.
- There is a progression of features throughout the park to easily provide users an ability to build their skills in an incremental fashion.
- The park opened to the public and has been getting rave reviews as one of the best skateparks in the world.

CONCRETE USAGE

- Construction of the North Bend Skatepark with Ready Mix Concrete, applied using a shotcrete method, was the only way to achieve the smooth flowing transitions, curves, and blends that were required by the design for this project.
- The 4,000 PSI, air entrained concrete and shotcrete were finished by hand troweling to a buttery smooth finish.
- The use of Ready-Mix Concrete also provided the opportunity to add color to the concrete. Integral concrete colors were used to produce vibrant details – Mount Si seen from the skatepark was why some of the colors were selected.

PROJECT STATS

Project Address –

Torguson Park 750 E North Bend Way
North Bend, WA 98045

Project Size –

13,000 Square Feet

Concrete Quantity –

350 Cubic Yards – 4,000 PSI air entrained
concrete and shotcrete

Construction Work Duration –

8 Months (June 2020 – February 2021)

Owner –

Mount Si Metro Parks

Local ACI Chapter/International Partner

Representative Name –

Bruce Chattin

Architecture Firm –

Grindline Skateparks, Inc.

Engineering Firm –

McKay Sposito

General Contractor –

Grindline Skateparks Inc.

Concrete Supplier –

Cadman Inc.
