

Public Discussion

ACI draft standards open for public discussion that are being processed through ACI's ANSI-approved standardization procedures can be found at www.discussion.concrete.org. These are not yet official ACI standards.

Public Discussion and Closure of "Specification for Pervious Concrete Pavement (ACI 522.1)"

On June 19, 2012, the Standards Board granted approval to release the draft standard for public discussion and to process it as an ACI standard. Public discussion was announced on September 1, 2012, and closed on October 17, 2012. The committee responded to the public discussion. TAC reviewed the closure and approved it on May 2, 2013. The Standards Board approved publication of the ACI standard on May 22, 2013.

The public discussion and the committee's response to the discussion are available on ACI's website, www.concrete.org (click on "Technical" on the menu bar and then on "Upcoming Standards").

Publish an article in *Concrete International* and help further the mission of ACI with your technical expertise.

We're interested in case studies that will help our readers do their jobs. So if you've learned (even the hard way) how to design, construct, or repair a concrete structure better, faster, or more cost effectively, let us—and the ACI membership—know.

Submission guidelines are at: www.concreteinternational.com/pages/about_ci_submit.asp.
