Code Requirements for Evaluation, Repair, and Rehabilitation of Concrete Buildings—ACI 562-13

This code provides minimum requirements for the evaluation, repair, rehabilitation, and strengthening of existing concrete buildings and, where applicable, non-building structures. The code comprises both prescriptive and performance requirements. Commentary is provided for both the prescriptive and performance requirements, and is intended to provide guidance to the licensed design professional and referenced sources for additional information on the material presented in the code provisions. The code and commentary are intended for use by individuals who are competent to evaluate the significance and limitations of its content and recommendations, and who will accept responsibility for application of the material it contains. The materials, processes, quality control measures, and inspections described in this code should be tested, monitored, or performed as applicable only by individuals holding the appropriate ACI Certifications or equivalent.

2013 Manual of Concrete Practice (MCP)

The American Concrete Institute's 2013 *Manual of Concrete Practice* contains 220 ACI committee standards and reports. ACI's *Manual of Concrete Practice* is the most comprehensive concrete reference set available. It contains all of the widely used ACI concrete and masonry code requirements, specifications, guides, and reports. Additionally, it includes information about code requirements, deflection, cracking, durability problems, temperature control, nondestructive testing, and hundreds of other topics. A complete listing of publications included in the 2013 edition and additional optional formats, including online subscription, multi-user license, and more, is available at www.concrete.org or by calling (248) 848-3800.
