GUIDE TO UNDERWATER REPAIR OF CONCRETE—ACI 546.2R-10

This guide covers the repair of concrete structures in the splash zone and underwater portions of structures located in lakes, rivers, oceans, and groundwater. Concrete deterioration, investigation and testing procedures, preparation, materials and methodology, and inspection procedures are described. Design considerations and references for underwater repair of concrete bridges, wharves, pipelines, piers, outfalls, bulkheads, and offshore structures are identified. Available in hard copy or PDF format.

Order Code: 546210.CI
Pages: 32
Prices: \$63.50 (ACI members \$39.00)

STRUCTURAL CONCRETE IN PERFORMANCE-BASED SEISMIC DESIGN OF BRIDGES—SP-271 CD-ROM

This CD-ROM consists of seven papers that were presented at a session sponsored by ACI Committee 341 at the ACI Fall Convention in St. Louis, MO, in November 2008. The papers focus on the most recent advancements in performance-based seismic design of reinforced concrete bridges, including analytical and experimental studies, and design and construction practices with relevant information related to reinforced concrete bridges based on performance-based design.

Order Code: SP271CD.CI
Format: CD-ROM
Prices: \$62.50 (ACI members \$37.00)

PCI DESIGN HANDBOOK, 2010—PUBLISHED BY PRECAST/PRESTRESSED CONCRETE INSTITUTE

This newly released seventh edition design guide for precast and prestressed concrete provides easy-to-follow design procedures, numerical examples, and both new and updated design aids. It provides the designer with comprehensive and efficient procedures for the safe design of both architectural and structural precast and prestressed concrete products. This edition includes new and updated information on shear-friction, blast design, stadium riser design, ledge hanger steel design, and impacts of ACI 318-08. Included is a CD-ROM that contains a searchable PDF version of the entire handbook and many references.

Order Code: PCIDH.CI
Pages: 804
Prices: \$390 (no discount on industry publications)

What's Coming

Fall 2010

Specifications for Structural Concrete—ACI 301-10

Residential Code Requirements for Structural Concrete and Commentary—ACI 332-10

Report on Floating and Float-In Concrete Structures—ACI 357.2R-10

Design Guide for the Use of ASTM A1035/A1035M Grade 100 (690) Steel Bars for Structural Concrete—ITG-6R-10

National Green Building Standard and Commentary

To order new publications, use the form on the Bookshelf page in the back of this magazine. You may contact ACI for additional information by phone at (248) 848-3800 or go to our online bookstore at www.concrete.org.
