Surface Preparation Equipment

GENERAL EQUIPMENT CO.

The electric-powered FCS10 Rip-R-Stripper™ provides a compact, lightweight alternative to larger walk-behind units. With an operational weight of only 40 lb (18 kg), the machine is easily transported, and its small size provides superior maneuverability in confined areas. The lightweight handle reduces vibration reduction, and it can be removed in seconds for simpler transportation. With a unitized, welded steel-plate frame and only one moving part, it's designed to handle the rigors of most jobs while requiring minimal routine maintenance. It accommodates cutting blades up to 10 in. (250 mm) wide, and several blade options are available to handle different materials and applications, including removing carpet, vinyl composition tile, linoleum, and mastics.

HUSQVARNA CONSTRUCTION PRODUCTS

Husqvarna Construction Products' series of surface preparation and dust collection systems are a unique balance of power, design, and tooling. The PG 820, the largest in the range of surface preparation and finishing machines, is equipped with patented Dual Drive Technology™, allowing the user to control the speed and rotation direction of both planetary and satellite grinding heads. This technology sets it apart from other machines and provides users with unmatched control, power, and a multi-functional range of applications. The PG 820 is an excellent choice for large and small applications, particularly for commercial purposes. It can be used in dustless applications when paired with the DC 5500 vacuum. The vacuum is a highly mobile and versatile unit for both wet and dry grinding, and it has a three-way filtering system for efficient containment of dust. It boasts an efficient particle filtration rate of 99.9% at 1 micron, and the unique bag-disposal system contains messy and hazardous substances.

Special Products & Practice Showcase

MK DIAMOND PRODUCTS, INC.

MK Diamond Products, Inc., manufactures a complete line of single/double disc grinders and scarifiers. The MK-SDG Single Disc Grinder is excellent for smoothing rough areas and other surface irregularities, feathering patches, and cleaning industrial floors. The tapered front nose provides enhanced visibility, and the removable handles and nose weight provide for easy transportation and storage. An easy-to-operate foot pedal raises grinding discs off the ground for engine starting and idling. It also features a fully encapsulated grinding shroud with vacuum pick up. The MK-DDG Dual Disc Grinder has been designed with two counter-rotating heads that prevent pulling during grinding. An ergonomically designed T-grip handle provides easy handling and maneuvering. The built-in dust shroud contains grinding debris, and the vacuum port allows for dust-free dry grinding. A water control valve is included for wet grinding. The grinder has a two-position wheel carriage for grinding and easy transport. Both grinders are designed for concrete cleaning; flattening and smoothing concrete surfaces; leveling out high spots and curled joints; removing coatings, mastics, epoxies, urethane, adhesive residues, and paint; and polishing concrete and natural stone.

New ACI Resources for Contractors and Craftsmen

Contractor's Guide to Quality Concrete Construction, Audio Version

Order Code: ASCC105CD.CI (CD Format)
ASCC105MP3.CI (MP3 Format)
Price: \$68.50 (ACI members \$38.00)
Format: 6-CD set or MP3 (Both formats include a 75-page printed book of photos, figures, tables, and checklists)

The best-selling Contractor's Guide to Quality Concrete Construction is now available in CD and MP3 audio formats. Educate yourself or your employees on quality concrete construction techniques and practices while waiting in a vehicle, traveling to and from work, or running between projects.

Concrete Craftsman Series 1—Slabs-on-Ground

Order Code: CCS110.CI
Price: \$35.00 (ACI members \$21.00)

This primary reference for the ACI Concrete Flatwork Finisher and Technician Certification programs has been completely revised and rewritten for 2010. The third edition includes more of the up-to-date information that concrete craftsmen need to know to produce quality flatwork.
