Welcome to the Spring 2022 Technical Chair Breakfast
Recently Published Committee Documents and Changes to Technical Committee Manual

Michael Brown, TAC Chair
The following documents have been published since October 2021:

- **CODE-122.1-21** Thermal Bridge Mitigation for Buildings Having Concrete and Masonry Walls and Masonry Veneer—Code Requirements and Commentary
- **CODE-562-21** Assessment, Repair, and Rehabilitation of Existing Concrete Structures—Code Requirements and Commentary
- **PRC-207.1-21** Mass Concrete—Guide
- **PRC-223-21** Shrinkage-Compensating Concrete—Guide
Recently Published Committee Documents

The following documents have been published since October 2021:

- PRC-327.1-21 In-Place Density Testing of Freshly Placed Roller-Compacted Concrete by Nuclear Gauge Testing—TechNote
- PRC-350.2-21 Hazardous Material Containment in Concrete Structures—Report
- PRC-364.4-21 Determining the Load Capacity of a Structure when Structural Drawings are Unavailable – TechNote
Recently Published Committee Documents

The following documents have been published since October 2021:

- PRC-423.8-21 Corrosion and Repair of Grouted Post-Tensioning Tendon Systems—Report
- PRC-440.10-21 Fire Resistance of FRP-Strengthened Concrete Members—TechNote
- PRC-551.3-21 Pitfalls of Deviating from ACI 318 Slender Wall Provisions—TechNote
Recently Published Committee Documents

The following documents have been published since October 2021:

- SPEC-548.9-21 Type ES (Epoxy Slurry) Polymer Overlay for Bridge and Parking Garage Decks—Specification
- SPEC-548.16-21 Epoxy and Aggregate High Friction Surface on Concrete —Specification
- SPEC-548.13-21 Multi-Component Epoxy Adhesive for Bonding to Concrete—Specification
- PRC-551.3-21 Pitfalls of Deviating from ACI 318 Slender Wall Provisions—TechNote
TCM Changes—Liaison Members

Clarifications were made to liaison members:

• Section 1.2.2.3-Liaison subcommittee

  • Liaison members represent another country or outside organizations with an established relationship with ACI

  • No more than one liaison member from an outside organization can be appointed on a given committee.
TCM Changes—Construction Specifications

New language added for construction specifications:

• ACI construction specifications are written in accordance with Chapter 6.

• Committee Chairs shall designate members of the specification committee to receive training on the content of Chapter 6 before the committee begins drafting the new construction specification.

• Documentation of this training is to be included when the construction specification is submitted for TAC review.
Committees can use incremental revisions instead of conducting a full document revision

- Committee must obtain TAC approval before submitting an incremental revision to TAC.
- Request must include summary of major revisions and justification for incremental review
- Revisions can be submitted yearly
- Does not apply to standards or documents that haven’t been reviewed for at least 10 years
TCM Changes—Incremental Revisions

• When a document receives an incremental revision, committees may request an extension of the 8-year cycle for a full document review.

• Typical extensions are two to three years. A maximum of a 10-year extension may be granted at the discretion of TAC, at which time a full revision of the document is required by the committee and will be reviewed by TAC.

• Does not apply to standards or documents that haven’t been reviewed for at least 10 years.
