This is a training session ONLY and ACI certification is NOT part of this program.

Who should attend: Staff at Testing Laboratories, Masonry Contractors, and Ready Mix Concrete Batch facilities who routinely test masonry materials used for construction, including laboratory staff, QA/QC Supervisors, project managers, Code Enforcement officials, City inspectors, or anyone interested in how to properly test masonry construction in the field.

Program Content:

Testing
Why do we test? What can we test? When do we test? How do we test?

Fundamentals of Masonry Laboratory Testing
Classroom and Laboratory hands-on training; Best practices and tips; How to interpret the results and identify common errors

Use, Maintenance, and Calibration of Equipment
How to properly use equipment; How to maintain and routinely calibrate equipment

ASTM Standards
These test methods will be included in the classroom and the hands-on training in the laboratory:
• ASTM C140 – Sampling and Testing CMU’s
• ASTM C1019 – Sampling and Testing Grout
• ASTM C780 Annex A4 – Mortar Aggregate Ratio
• ASTM C780 Annex A6 – Compressive Strength of Mortar
• ASTM C1552 – Capping CMU’s

These specifications will be discussed:
• ASTM C90 Specification for Load Bearing Concrete Masonry Units
• ASTM C270 – Specification for Mortar for Unit Masonry
• ASTM C1314 – Compressive Strength of Masonry Prisms
• ASTM C39 – Compressive Strength of Cylindrical Concrete Specimens
• ASTM C109 – Compressive Strength of Hydraulic Cement Mortars
• ASTM C617 – Capping Cylindrical Concrete Specimens

Interested? Contact your regional ACI Resource Center to set up your training!

For more information or to set your training dates, contact an ACI Resource Center near you:

ACI Southern California Resource Center
