

THE WORLD'S GATHERING PLACE  
FOR ADVANCING CONCRETE

# International Lunch

SUNDAY, MARCH 27, 2022

11:30 AM – 1:30 PM | \$40 U.S. PER PERSON

## Concrete Construction Design of an International Theme Park— The Intelligent Approach

A well-designed, themed concrete building is one that achieves the minimum performance levels, and the team members and guests are all satisfied with the results. This typically occurs when the creative intent is maintained throughout the design and construction process while ensuring cost and schedule goals are achieved. Carlos Beato will explore a compilation of real-world experiences from a structural design and construction perspective of major theme park developments internationally, focused on identifying the best practices to approach these massive projects so that design and construction time is used efficiently. Get informed on ways to design and structure themed concrete buildings, so the most cost-effective structure is achieved while delivering best-in-class entertainment.

Carlos Beato

*Carlos Beato is an experienced structural engineer, holding professional engineering licenses in multiple states. Driven by his dedication to service, innovation, quality, and sustainability, he strives to deliver lasting, sustainable solutions that provide value and positively impact the communities he served as well as the world. In addition to his primary role, Beato has been recognized by ASCE and nominated to participate in the SEI Sustainability committee for his extraordinary commitment to quality and sustainability.*

The ACI Concrete Convention will take place at the  
Caribe Royale Orlando in Orlando, FL, USA, March 27-31, 2022.
