## SP FINAL SUBMISSION PACKAGE GUIDELINES

Before publication of an SP, final approval must be obtained from the ACI Technical Activities Committee.

Please submit the following for final approval:

- Completed [Final Request Form](#), listing:
  - Manuscript titles and authors, given in their order of appearance in the SP.
  - All reviewers, along with which papers each reviewed, including papers reviewed but not included in the SP.
  - A preface to the SP. Please include specific information, such as when and where the papers were presented. Any acknowledgements or dedications should appear in the preface.
- Completed [Peer Review Forms](#) for all papers (accepted or not). The reviewers' names must be legible.
- For each accepted paper:
  - An MS Word file and a pdf of the manuscript;
  - A completed [Final Submission Checklist](#), confirming that reviews were conducted in accordance with ACI procedures, that all reviewers' comments were adequately addressed by the authors in the final version of the manuscript, and that the manuscript adheres to the [SP Style and Format Guidelines](#);
  - A biography for each author (usually in the text of the manuscript);
  - The address and contact number of the lead author, who will receive a complimentary copy of the finished SP; and
  - A [Copyright Transfer Form](#) signed by all authors of the manuscript.

*Note: For authors to submit the copyright transfer form electronically, they must complete each field, type their name in the signature field, save the form, and attach the file in an e-mail to the SP Editor. They must state in the e-mail that they typed their name in the signature field of the form, and are thereby accepting the terms of the agreement. Otherwise, a hand-signed copyright transfer form must be submitted.*

### Final submission material and questions regarding your SP should be directed to:

Barbara Coleman  
SP and Session Coordinator  
Engineering Department  
American Concrete Institute  
38800 Country Club Drive  
Farmington Hills, MI 48331, USA
