i. Recap of merger of ACI 364.3R with ICRI 320.3R

1. At the 2016 TAC summer meeting, Goodwin reported that Committee 364 would like to cosponsor ACI 364.3R, Concrete Repair Material Data Sheet Protocol, with ICRI. Both groups have similar documents. ICRI offers it for free and is more up to date than the ACI document.
2. Goodwin will ask Committee 364 to withdraw their document at the upcoming meeting in Oct. and if unsuccessful will ask ICRI 320 to withdraw their version in Nov. The committee must ballot to withdraw. ACI 364 voted to update the document.
3. Fred Goodwin, TRRC chair, Matthew Senecal, TAC secretary, and Khaled Nahlawi, TRRC secretary had a conference call to create a mechanism to initiate a joint organization document.

ii. Documents as member benefit update.

1. An initiative championed by D. Whitmore coordinating the documents of E706, ACI 364, and ACI 546 to consider making the documents from these committees available as a free member benefit pdf download. Sales would continue to non-members and for hard copies. These committees had voted to ratify this initiative. Goodwin will pursue with ACI to determine the course of action.
2. Little interest from ACI staff and management in pursuing this initiative due to disruption of the current revenue model. R. Burg reported that consideration of membership dues, document pricing, and other member benefits was the subject of an ongoing survey to determine the best balance of options. One of the suggested options in the survey was to provide most documents as a member benefit and make up the loss of revenue by increasing fees from other areas.
