Meeting Agenda

ACI 318-25 Subcommittee P – Precast and Pretensioned Concrete
Virtual Meeting
Tuesday, March 31, 2020
1:30pm – 6:00pm (CST)

Committee Members
Carin Roberts-Wollmann, Chair          Tom Schaeffer
Tess Ahlborn                             Andrea Schokker
Suzanne Aultman                          Steve Seguirant
Robbie Barnes                            Edith Smith
Jared Brewe                              Lesley Sneed
Neil Hawkins                             John Stanton
Jason Krohn                              Jeff Volz
Bruce Russell

1. Administrative
   1.1. Welcome and introductions
   1.2. Logistics of online meeting
   1.3. Approval of agenda
   1.4. Approval of minutes of Fall 2019 meeting

2. Background and collaboration
   2.1 Updates on MOUs for 319 and 320 (Schokker)
   2.2 Role of 318-P (Roberts-Wollmann, with 319 input from Schokker)
   2.3 List of code items from PCI Design Standard Committee (Smith)
   2.4 Code change proposals being discussed in 318-T (Schokker)
   2.5 Review of sample draft provisions (318, 319) (Schokker)

3. Discuss/resolve negatives from letter ballot
   3.1 CP001b – Permissible tensile stress in pretensioned strand before transfer
   3.2 CP002a – Reference alternate methods to calculate deflections of Class T and C

4. Possible Code Change Proposals
   4.1. Minimum concrete strength at release (Seguirant)
   4.2. Minimum threshold value for ASTM A1081 (Russell, Ahlborn, Seguirant)
4.3. Development of debonded strands (Russell, Ahlborn, Seguirant)

4.4. Shear strength of Class C concrete (Roberts-Wollmann with Sub E update from Sneed)

4.5. Flexural ductility requirement for prestressed beams and slabs (Staunton and Aultman)

4.6. Clarification of commentary language for $V_d$ (Schokker and Roberts-Wollmann)

4.7. Detailing requirements for crack control reinforcement at release (Roberts-Wollmann) (item dropped during 318-19 code cycle)

4.8. Update on shear friction discussions in Sub E (Sneed)

5. New Business

6. Adjournment
