

ACI 335 Committee  
Composite and Hybrid Structures  
Sunday, October 14, 2007  
11:30 AM- 1:00 PM

Location: Fajardo, PR BOARDROOM 4

## **AGENDA**

1. Call to order and introduction.
2. Apologies from Chair: Committee members, my apologies for the last minute change in my travel plans. My travel funds for this convention were not approved in time due to a paperwork problem and I had not made alternate plans. I hope Gustavo will walk you through today's meeting and lead any required discussions. An important milestone coming up for next convention is the change in chair for this committee. I will hope that you will provide the new chair with renewed energy and initiatives to keep this committee active in times when ACI is looking to streamline the technical committees structure.
3. Approval of minutes from the Atlanta Spring 2007 meeting.
4. Approval of agenda; addition of other items.
5. Introduction of member(s) and visitors.
6. Update on ACI-AISC joint effort on design of hybrid and composite construction. (Parra)
7. Other projects in progress.
8. Future meeting.
9. Adjournment.
