3.0 Repair Issues in 318 (Poston/Ghosh)

In Phoenix, Poston made a presentation to ACI Committee 318 on whether Committee 318 should indicate which of its provisions were also applicable to existing buildings (sometimes with certain modifications). The next day, S.K. Ghosh introduced this topic for TAC discussion. He reported that Committee 318 needed guidance on this issue and that some members of Committee 318 thought that there was probably room for a separate code for repair and rehabilitation of existing concrete buildings. Some TAC members commented that a separate repair code was not needed and would be undesirable. Poston indicated that his preference would be for Committee 318 to spell out what is and what is not applicable to existing construction. Ghosh is invited to attend the TRRC meeting to discuss this matter.

4.0 Update of Concrete Repair Manual (Emmons/Poston)

5.0 TRRC FAQ Review

No new FAQs have been submitted to headquarters. Sneed to report on the status of the existing FAQs.

6.0 TRRC Oversight Role of Committees (Poston)

6.1 Organization of Committees

6.2 Technical Document Oversight

6.3 Final Plan for TAC

7.0 Website Fixconcrete.org (Emmons)

7.1 TRRC Review Process (Poston)

8.0 Datasheet Protocol (Poston/Emmons/Page)

At the special meeting in Baltimore, January 2003, Alex Vaysburd reported that an ICRI task group is in the process of finalizing their version of a repair material data sheet protocol (IRMDSP), but they are interested in having ACI adopt it in some form so that it can be a recognized standard in the industry. Kelly Page (ICRI) is invited to report on behalf of ICRI and on a possible MOU regarding the joint ACI/ICRI development of a IRMDSP standard discussed the meeting in Phoenix (refer to OCT. 2002 TRRC Meeting Minutes).
