9. Adjourn

NOTE: Immediately following the 308-A meeting as time allows, it is requested interested and available members remain for informal discussions covering the following:

- The need for an Emerging Technology Report
- The need for a Contractor focused curing document (vision of what the document structure might be, timing of when to begin work on document, who would be interested in helping to develop it, etc)
- Refine ideas for topics/speakers at sessions in Phoenix (8 speaker slots @ 27 min each)

Current Official ACI Definition for Curing

Action taken to maintain moisture and temperature conditions in a freshly placed cementitious mixture to allow hydraulic cement hydration and (if applicable) pozzolanic reactions to occur so that the potential properties of the mixture may develop. (See ACI 308)
