Sections /Task Groups:
 - I. **Performance Criteria**
 - II. **Performance Parameters for Modeling**
 - III. **Review of Economic implication of proposed guideline**

Design guidelines format was discussed. As first step it was proposed to prepare a short article for Concrete International (CI) magazine covering the survey results. The main purpose of the article is to share with other practitioners the survey results and encourage more people to participate in the survey. The article will also provide some comments on limit state (service and ultimate) based on survey data.

It was proposed that the committee ballot the article to engage its members to contribute.
