

**ACI COMMITTEE 239
ULTRA-HIGH PERFORMANCE CONCRETE
2014 ACI Spring Convention
Reno, Nevada, USA
Monday, March 24, 2014 3:30 pm – 5:30 pm**

Grand Sierra Resort – Sierra 2

AGENDA

1. Welcome and Introductions
2. Approval of Agenda
3. Approval of October 2013 – Phoenix, AZ meeting minutes
4. TAC Report
5. Membership
6. Subcommittee Reports
 - a. 239-A Emerging Technologies Report – Micah Hale
 - b. 239-B Report on UHPC– John Myers
 - c. Long-term planning – the next priorities
 - i. Structural Design Guide discussion – Vic Perry
 - ii. ASTM test methods – follow-up of ASTM Symposium
 - iii. Identifying research gaps – Jimm Milligan
7. Upcoming Sessions – Kay Wille
 - a. March 25, 2014, 4-6pm, Reno: *UHPC Innovations in Seismic Performance*
 - b. Fall 2014: Washington DC, *UHPC Behavior under Blast and Impact Load Effects, Part 1 and 2* – abstracts due to Kay Wille by 3/26/14
kwille@engr.uconn.edu
 - c. Spring 2015 – Kansas City; Fall 2015 – Denver, CO; Spring 2016 – Milwaukee
8. Collaborations
 - a. International updates (please contact Tess Ahlborn tess@mtu.edu)
 - b. ACI Committees: 363 (Hale/Myers), 370 (Crane), 544 (Wille/Milligan), 549 (Dubey), other
9. Research updates: open
10. Other business – Awaiting final approval for definition in CT 2014: *Concrete, ultra-high performance – concrete that has a minimum specified compressive strength of 150 MPa (22,000 psi) with specified durability, tensile ductility and toughness requirements; fibers are generally included to achieve specified requirements.*
11. Adjourn – next meeting October 2014, Washington DC, USA
