

CONCRETE CONVENTION

THE WORLD'S GATHERING PLACE FOR ADVANCING CONCRETE

INTERNATIONAL LUNCH

Development of Prefabrication of Structural Concrete in Europe

This presentation traces the evolution of concrete prefabrication—from its artisanal beginnings to the rise of industrialized systems in the mid-twentieth century. It explores how construction demand and prestressing techniques fueled growth, compares prefabricated and cast-in-place methods, and highlights innovations in architectural concrete. Applications across diverse environments, the role of advanced materials, sustainability considerations, and contributions from scientific-technical bodies and standardization efforts are also discussed.

SUNDAY, OCTOBER 26, 2025

11:30 AM – 1:30 PM

\$50 USD PER PERSON
