

Multi-functional Additively Constructed Wall System for Housing and Sheltering

Anthony Mackin¹, Zaid Hanoun², Jenna Migliorino¹, Aly
Ahmed¹ and Islam M. Mantawy³

¹Ph.D. Student

²MS.c Student

³Assistant Professor

Toronto, ON, Canada, April 2025

Construction industry over the last decades

Comparison of construction techniques between 1950s (left) and 21st century (right).

Conventional Construction
(forming, reinforcement placement & casting)

**Additive Construction
with Optimization**

Hybrid Construction
(printing formwork, reinforcement
placement & casting)

Mixes for Additive Construction

- Printability
- Fresh and Hardened Properties
- Shrinkage

Overview

American Concrete Institute

Flow Table Test
(ASTM C230/C230 M-21)

Setting Time
(ASTM C191-21)

Compressive Strength
(ASTM C109)

Extrudability

Buildability

Fused Layers

Scanning (LiDAR)
(Collaboration with Dr. Trias)

Multi-functional Additively Constructed Wall System for Housing and Sheltering

Rowan University
ADDITIVE AND ROBOTIC CONSTRUCTION
LABORATORY (ARC-LAB)

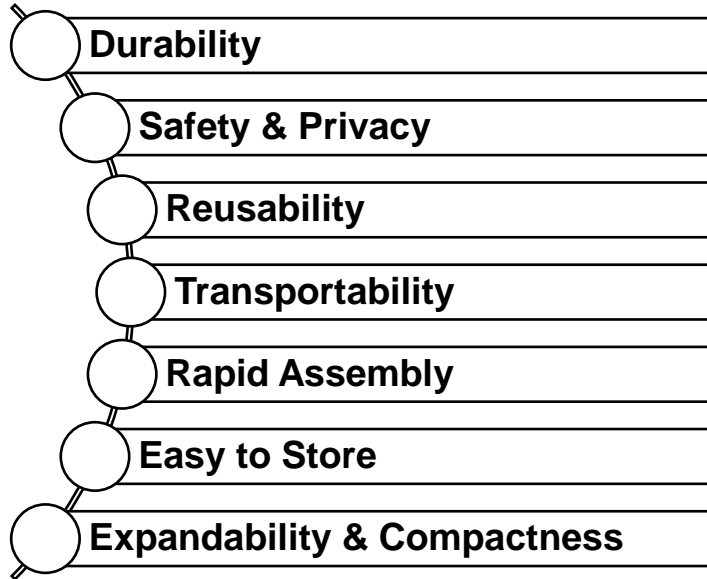

Different Printing Systems at ARC-LAB

Successful Extrusion and Buildability (Different Systems, 1K)

In 2023, natural disasters displaced more than 2.5 million Americans

Cerrahoglu and Maden (2022) proposed another set of important criteria for temporary shelters

SuperAdobe (Eco-Dome)

Future Shack

U-Dome

Proposed Multi-Functional Wall

American Concrete Institute

- ✓ Durability
- ✓ Safety and Privacy
- ✓ Reusability
- ✓ Transportability
- ✓ Rapid assembly
- ✓ Easy to store
- ✓ Expandability
- ✓ Compactness
- ✓ Flexibility

Multi-functional Additively Constructed Wall System for Housing and Sheltering

Rowan University

ADDITIVE AND ROBOTIC CONSTRUCTION
LABORATORY (ARC-LAB)

1- Raw Materials

2- Mixing and Material Testing

3- Modeling and Slicing

4- Printing Equipment

5- 3D Printing

6- Wall Assembly
