

Public Discussion

ACI draft standards open for public discussion that are being processed through ACI’s ANSI-approved standardization procedures can be found at www.concrete.org/discussion. These are not yet official ACI standards.

Document number	Title	Open for discussion	Discussion closes
548.8	Construction Specification for Type EM (Epoxy Multi-Layer) Polymer Overlay for Bridge and Parking Garage Decks	8-25-2017	10-9-2017

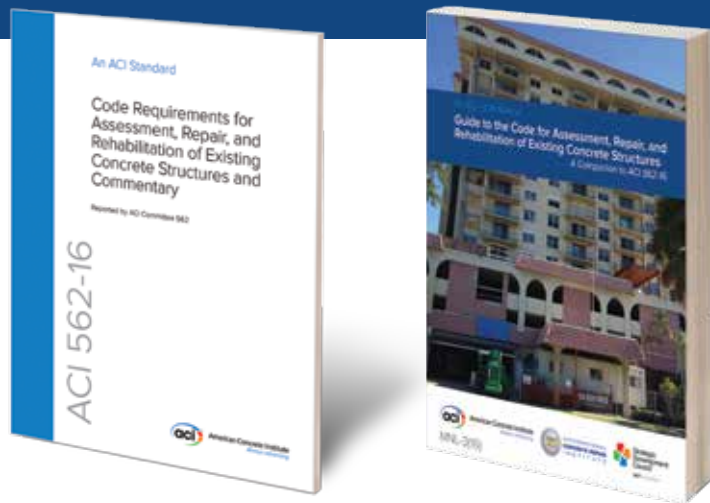

Public Discussion and Closure of “Code Requirements for Seismic Evaluation and Retrofit of Existing Concrete Buildings (ACI 369.1) and Commentary”

The ACI Technical Activities Committee (TAC) approved the draft standard subject to satisfactory committee response to TAC comments in April 2016. The committee responded adequately to TAC’s comments and all balloting rules were adhered to. On March 13, 2017, the Standards Board granted approval to release the draft standard for public discussion and to process it as an ACI standard. Public discussion was announced on April 10, 2017, and closed on May 25, 2017. The committee responded to the public discussion. TAC reviewed the closure and approved it on August 21, 2017. The Standards Board approved publication of the ACI standard on August 28, 2017.

The public discussion and the committee’s response to the discussion are available on ACI’s website, www.concrete.org/discussion.

Concrete Repair Code Requirements and Project Examples

ACI 562-16 is the first code specifically for repairing reinforced concrete. The companion publication, “Guide to the Code for Assessment, Repair, and Rehabilitation of Existing Concrete Structures,” includes chapter guides and project examples.

Looking for more on ACI 562-16? ACI has produced a series of on-demand courses that review the process behind the ACI 562 repair code and showcase several project examples.
