

Mortar Net Solutions Relocates Headquarters

Mortar Net Solutions, a supplier of moisture management solutions for masonry walls, relocated its headquarters from Burns Harbor, IN, to Portage, IN. The move brought the company's offices, warehouse, and manufacturing together under one roof, facilitating better coordination between teams. The company also took the opportunity to update their IT infrastructure at the time of the move. Improved communications technology will keep teams better connected, and inventory and manufacturing information will be up to date and available in real-time.

Charah Solutions Announces New Fly Ash Storage Terminal in Central Massachusetts

Charah® Solutions, Inc., a provider of environmental and maintenance services to the power generation industry, announced that it opened a rail-served fly ash distribution terminal with storage in Hopedale, MA. The terminal and silos will serve customers throughout New England, where demand for quality fly ash is growing. The new facility has easy access to nearby freeways and direct routes to Rhode Island and New Hampshire, allowing for efficient distribution of products to customers throughout the region.

KINSHOFER Acquires Hammer SRL

KINSHOFER expanded its product line to include hydraulic breaker excavator attachments following the acquisition of Hammer SRL, an Italy-based manufacturer of

demolition, excavation, recycling, and material-handling attachments. KINSHOFER chose the company because of its reputation for quality and more than 30 years of experience in the market. The new line includes 22 breakers for carriers from 0.5 to 200 tons (0.5 to 180 tonnes). KINSHOFER announced the acquisition and debuted the new breaker line at World of Concrete 2019. The Hammer management team will remain in place and continue manufacturing in Italy. Hammer and KINSHOFER will add additional staff to ensure a smooth launch of Hammer's products and services worldwide through KINSHOFER's global network. Hammer attachments will retain their current branding in Europe but will be marked KINSHOFER in North America.

Creative Design Resolutions Project Wins ACEC National Recognition Award

The Creative Design Resolutions (CDR) project Southgate Virginia Tech won national recognition through the American Council of Engineering Companies (ACEC) 2019 Engineering Excellence Awards. Southgate Virginia Tech is a gateway bridge located at Southgate Drive and the US-460 Bypass Interchange in Blacksburg, VA. CDR helped bring unity to the design and balance to the initial concepts presented by stakeholders as part of a larger project team comprising A. Morton Thomas & Associates, Inc.; Athavale, Lystad & Associates, Inc.; Virginia Tech University; and the Virginia Department of Transportation (VDOT). The National Recognition Award was presented at the ACEC Engineering Excellence Awards Gala on May 7, 2019, at the Marriott Wardman Park Hotel in Washington, DC.

Pettibone Adds Bracing Systems, Inc., to Dealer Network

Pettibone/Traverse Lift, LLC, announced the addition of Bracing Systems, Inc., to its dealer network. Bracing Systems is a construction equipment distributor founded in 1972. With locations in Hanover Park, IL, and Mokena, IL, Bracing Systems will primarily focus on sales and service of Traverse telehandlers for northern Illinois and a portion of northwest Indiana. In taking on the Pettibone Traverse, Bracing Systems now offers a new telehandler product line with a traversing boom carriage, which allows operators to safely place loads at full lift height without needing to coordinate multiple boom functions.

Three Heavy Construction Contractors Earn B2W Software 2019 Client Innovation Awards

B2W Software, a provider of heavy civil construction management software, named the three winners of its 2019 Client Innovation Awards during the company's annual User

Conference in March. Winners were selected based on applications they submitted highlighting measured return on investment (ROI) and improvements to operational efficiency.

Priestly Demolition of Toronto, ON, Canada, was recognized for Best Use of the B2W ONE Platform for its success with multiple, unified B2W products for estimating and operations. Priestly Demolition specializes in demolition and remediation services. The company has doubled its bid capacity since adding B2W and has seen other benefits: transparency and information sharing across departments, increased equipment uptime, and efficiencies in exporting data to its accounting and project management systems.

From left: Ryan Priestly, President of Priestly Demolition, accepting the B2W Software 2019 Client Innovation Award for Best Use of the B2W ONE Platform; and Bob Brown, President of B2W Software

Soletanche Bachy Canada, also of Toronto, earned Best ROI with a Single B2W Element for results achieved after replacing spreadsheets with B2W Estimate for its estimating and bidding process. The company completes pile foundations, excavation and shoring, marine construction, and specialized foundation work. Their award application described the value of being able to generate and analyze multiple bid scenarios in minutes.

Casella Construction of Mendon, VT, won the award for Visionary Use of the ONE Platform for tailoring the software in a unique manner to address challenges of a transportation division that serves internal and third-party customers. Casella Construction specializes in infrastructure and utility construction, site development, demolition, landfills, and remediation. In its award application, the company emphasized creative use of the software to address complex challenges within its transportation division.

CorteCros Location Expands in Split, Croatia

CorteCros®, part of Cortec® Corporation Europe, expanded its warehouse location in Split, Croatia, with a new

manufacturing facility and laboratory. Cortec's proprietary VpCI®/MCI® products are now manufactured in Split in accordance with REACH regulation, which enables them to be shipped everywhere inside the European Union. CorteCros's new facility and lab are equipped with modern instruments and perform on-site batch testing compliant with EU and ASTM standards.

Ware Malcomb Opens New Office in Dallas

Ware Malcomb opened a new office in the arts district of Dallas, TX, bringing the total number of Ware Malcomb offices across the United States, Canada, Mexico, and Panama to 23. Founded in 1972, the firm provides planning, architectural design, interior design, branding, and civil engineering services for commercial real estate and corporate clients. The company hired Chris Mavros as Regional Director to lead the new Dallas office. In this role, Mavros will be responsible for the overall growth and management of the firm's operations in Dallas, in addition to working regularly with Ware Malcomb's Houston, TX, office to collaborate on projects across the state.

Raken Software Helps Alta Construction Build Client Network

Raken, a daily reporting app and field management solution for the construction industry, announced a partnership with nationwide contractor Alta Construction. With Raken's cloud-based reporting and management software, Alta coordinates data for clients around the United States, gathering project updates, photos, and other documentation together in a single, accessible place. Raken helps contractors capture more data in less time, and its dashboard provides a transparent, up-to-the-second record of a project. Tyler Guith, General Superintendent for Alta, called the partnership with Raken a "game-changer."
